

## SCANDINAVIAN CRUISERS

# Recapture the essence of sailing...

"The overall look of the SC 40 is quite unique, a blend of traditional as well as modern. The lines and surfaces are very clean and crisp."

Nis Peter Lorentzen

### The Scandinavian Cruiser 40

The SC40 is based on the Skerry Cruisers from 100 years ago. The Skerry Cruisers were and are "Square Meter Boats" in various sizes as defined by the Skerry Cruiser (Square Meter) Rule. One of the current sizes still sailing in active fleets is the 30 Square Meter, and it is this version on which the SC 40 is based, being of similar length and weight. However, there is no regard taken at all to the Skerry Cruiser Rule in the design of the SC 40, or to any other design rule. The SC 40 will be a class unto itself combining classic beauty with modern hi-tech materials and construction techniques.

#### Stunningly beautiful design

For 100 years sailors have admired the sleek looks of the classic Skerry Cruisers (Square Meter Yachts). The design of the new Scandinavian Cruiser is admired by experienced sailors and landlubbers alike, giving the owner a sense of true pride of ownership.

**Superior maneuverability** Scandinavian Cruiser is an extremely pleasurable boat to sail - heeling over and accelerating gracefully and gradually, whilst the helmsman always has full control of the steering at any angle of heel.

#### For today's busy lifestyle

With high demands on our free time and the difficulty in finding sailing crew in mind, Scandinavian Cruiser is designed for safe and easy single or short-handed sailing by one person, couples, small families and friends, for fair-weather day-sailing, shallow water anchoring, convenient trailering, and fast Corinthian club and one-design racing.

#### High speed at all points of sail

The light, long and sleek hull accelerates fast in even the lightest puff of wind and the narrow bow cuts gracefully through the waves. No other boat points higher to the wind nor tacks more easily through narrow straits such as the Swedish archipelago.
